The HCI Solution, Inc. Products and Services

NPR REPORT WRITING SERVICES

Includes MEDITECH NPR and 6.x Report Designer, as well as MEDITECH's Data Repository and other 3rd party data sources. Our comprehensive knowledge of MEDITECH supplies your staff with a reliable extension of your organization, to deliver complex reports quickly and consistently.

DATA REPOSITORY REPORT WRITING AND ANALYSIS SERVICES

Don't let DR reporting get you down. Leave it to us! DR analysis will help ensure you have the data needed in the DR to run active reports.

6.X REPORT DESIGNER SERVICES

Leave all your report writing to us! Report designer is a snap with HCI's Meditech-trained staff.

INTEGRATION/INTERFACE SERVICES

Our team of programmers can help you reach your integration goals, whether it is for a single HL7 Interface, Custom Project, or an Interface Suite. We have over 25 years experience, working with over 800 healthcare vendors.

CONVERSION SERVICES

HCI works with consulting firms and hospitals to convert sites that are changing HCIS vendors or upgrading to Meditech's newest version.

PAPERSTORE

Document storage and retrieval. With state of the art imaging, any document such as EOBs, Medical Records, Insurance Cards, etc., can be quickly scanned or imported, secured, and indexed by custom defined fields, making documents available within seconds.

PAPERSTORE ARCHIVING AND CONVERSION

A low cost application solution for converting your legacy data. Whether it be Siemens, EPIC, Cerner, Meditech, CPSI, etc., we can help with storage and retrieval and eliminate the high cost of converting.

MPI MERGEIT

Designed to help hospitals clean up MPI's. MPI MergeIT helps to identify duplicate records, automatically merges duplicates, and has the ability to monitor duplicates as they occur in the future.

The HCI Solution, Inc. Products and Services

SYNCSOLVE™ DICTIONARY MANAGEMENT

Cost-effective dictionary management tool that enables hospitals to effortlessly build, manage and sync Meditech dictionaries by eliminating the manual process – no scripting needed.

SYNCSOLVE™ AS A SERVICE

Engage our Integration Engineers to use SyncSolve™ to apply custom changes to dictionaries for unique use cases.

CONTRACT MANAGEMENT/BAA MANAGEMENT

Enables healthcare facilities to easily locate, review, and manage contracts with alert system notification.

BUSINESS ANALYTICS MANAGER (BAM)

Key Performance Indicators (KPI) are at your fingertips with our business analytics dashboard. BAM gives you the KPI's across your entire enterprise and not just Meditech.

PHI AUDIT MANAGER (PAM)

PAM is part of HCI's Business Analytics Manager. PAM actively monitors and alerts on PHI access, identify theft, break glass and other proactive templates to effectively protect patient privacy.

DICTIONARY EDIT MODULE (DEM)

DEM is part of HCI's Business Analytics Manager. DEM actively monitors and alerts on dictionary maintenance and reviews the history of dictionary changes that affect your system daily.

STAFF USER MODULE (SUM)

SUM is part of HCI's Business Analytics Manager. SUM actively monitors and alerts on staff activity on devices, timecards, door entries, application usage, and other activity. SUM is designed to help monitor productivity and accountability.

PC AlertIT

PC AlertIT is part of HCI's Business Analytics Manager. PC AlertIT actively alerts physicians, and users about incomplete records, unsigned reports, downtime, and other deficiencies. AlertIT runs as a PC task tray companion to help keep staff up to date.

PRODUCT BRIEF

OUR MISSION:

HCI provides healthcare software solutions that connect people with information to improve efficiency and enable better, more consistent patient care. Our secure, reliable and cost-effective software solutions increase operational efficiency and reduce costs.
