

## The HCI Solution, Inc. Products and Services

**REPORT WRITING SERVICES** - Includes MEDITECH NPR and 6.x Report Designer, as well as MEDITECH's Data Repository and other 3rd party data sources. Our comprehensive knowledge of MEDITECH supplies your staff with a reliable extension of your organization, to deliver complex reports quickly and consistently.

**DR REPORT WRITING AND ANALYSIS SERVICES** - Don't let DR reporting get you down. Leave it to us! DR analysis will help ensure you have the data needed in the DR to run active reports.

**CUSTOM SCRIPTING** - Need to automate a manual process? Let HCI's trained staff create custom scripts to achieve those goals. We can use your scripting tool or supply one.

**INTEGRATION/INTERFACE SERVICES** - Our team of programmers can help you reach your integration goals, whether it is for a single HL7 Interface, Custom Project, or an Interface Suite. We have over 27 years' experience, working with over 800 healthcare vendors.

**INTERFACE ENGINE SERVICES** - The HCI Solution provides Interface Engine Services to support you and your engine. Let the HCI Solution's interface engine management, monitoring and alerting support services take away your engine support anxiety.

**SCANNING/ARCHIVING** - Document storage and retrieval. With state of the art imaging, any document such as EOBs, Medical Records, Insurance Cards, etc., can be quickly scanned or imported, secured, and indexed by custom defined fields, making documents available within seconds.

**ARCHIVING AND SCANNING CONVERSION** - A low-cost application solution for converting your legacy data. Whether it be McKesson, EPIC, Cerner, Meditech, CPSI, etc., we can help with storage and retrieval and eliminate the high cost of converting and maintaining legacy systems.

**CONVERSION SERVICES** - HCI works with consulting firms and hospitals to convert sites that are changing HCIS vendors or upgrading to Meditech's newest version.

**MPI MERGEIT** - Designed to help hospitals clean up MPI's. MPI MergeIT helps to identify duplicate records, automatically merges duplicates, and can monitor duplicates as they occur in the future.

**RELEASEIT ROI** - Improve efficiency by automating your release of information requests with ReleaseIT.

**SYNCSOLVE® DICTIONARY MANAGEMENT** - Cost-effective dictionary management tool that enables hospitals to effortlessly build, manage and sync Meditech dictionaries by eliminating the manual process – no scripting needed.

**SYNCSOLVE® AS A SERVICE** - Engage our Integration Engineers to use SyncSolve™ to apply custom changes to dictionaries for unique use cases.

### **IDENTIT - IDENTITY AND ACCESS MANAGEMENT**

Let The HCI Solutions Identity and Access Management solution provision, de-provision, and update access controls for users and providers to all of your downstream systems including provider credentialing systems.

### **CONNECTIT - Fire (FHIR) up your Meditech data with HCI**

ConnectIT. ConnectIT is a webservice based solution that gives access to your Meditech data via secure SOAP/JSON requests. Empower your staff, Interface Engine, NPR Report Writing or Other vendors with simple, industry standard access to MAGIC, CS, and M-AT data. Affordable, scalable, and reliable access without the need for complicated interfaces. ConnectIT enables your staff to effortlessly leverage widely available industry standard tools developed for the 21<sup>st</sup> century.

**BUSINESS ANALYTICS MANAGER (BAM)** - Key Performance Indicators (KPI) are at your fingertips with our business analytics dashboard. BAM gives you the KPI's across your entire enterprise and not just Meditech.

**PHI AUDIT MANAGER (PAM)** - PAM is part of HCI's Business Analytics Manager. PAM actively monitors and alerts on PHI access, identify theft, break glass and other proactive templates to effectively protect patient privacy.

**DICTIONARY EDIT MODULE (DEM)** - DEM is part of HCI's Business Analytics Manager. DEM actively monitors and alerts on dictionary maintenance and reviews the history of dictionary changes that affect your system daily.

**STAFF USER MODULE (SUM)** - SUM is part of HCI's Business Analytics Manager. SUM actively monitors and alerts on staff activity on devices, timecards, door entries, application usage, and other activity. SUM is designed to help monitor productivity and accountability.

**PC ALERTIT** - PC AlertIT is part of HCI's Business Analytics Manager. PC AlertIT actively alerts physicians, and users about incomplete records, unsigned reports, downtime, and other deficiencies. PC AlertIT runs as a PC task tray companion to help keep staff up to date.
