

Complimentary **COVID-19** Lab Result Reporting Required by HHS

We are facing unprecedented times. The effects of the which are growing at an alarming rate. Now is the time to help each other.

The Whitehouse and Coronavirus Task Force has **requested** hospitals that do in-house COVID-19 lab testing send the test reports to **HHS** daily.

To alleviate the burden this could add to already taxed hospitals, The HCl Solution has created this report for Meditech facilities that can be scheduled and written to send to the HHS daily.

COVID-19 lab results from in-house laboratories:

The federal government requests that these results should be reported to the Federal Emergency Management Agency (FEMA) using a standardized template by **5 p.m. ET each day** and reflect the results through midnight of the previous day. The standardized should be emailed to the following address: fema-hhs-covid-diagnostics-tf@fema.dhs.gov. The letter notes that those **hospitals who send all of the COVID-19 reporting to select commercial labs do not need to submit data**. Those selected commercial labs are LabCorp, BioReference Laboratories, Quest Diagnostics, Mayo Clinic Laboratories and ARUP Laboratories.

This new reporting will replace the data collection the AHA had previously launched.

[Click here](#) to submit your request for the automated Lab Result report. By submitting your request, The HCI Solution will send you a copy of the free report with instructions on how to automate the process.

The HCI Solution

HCI creates software solutions that make connecting physician and clinical staff to healthcare information effortless. Our suite of HIPAA-compliant and Meaningful Use certified products enable healthcare providers to increase efficiency, improve clinical workflow, meet patient safety initiatives and improve the delivery of care. With our customers working on the frontlines during this global crisis we are working to ensure we do what we can to support our healthcare community.
