

**Health Care Integrated Solutions**

**SyncSolve® Dictionary Management** – Cost-effective dictionary management tool that enables hospitals to effortlessly build, manage and sync MEDITECH dictionaries by eliminating the manual process – no scripting knowledge necessary.

**ContinuTy™ Downtime Portal** – Triumph over system downtime with an intuitive, secure, web-based solution that mimics the electronic record for painless adoption.

**MPI MergeIT™** – Designed to help hospitals clean up MPI's. MPI MergeIT™ helps to identify duplicate records, automatically merges duplicates, and has the ability to monitor duplicates as they occur in the future.

**M-AT Object Module – (MOM©)** – MOM© is an advanced NPR tool that a report writer can use to pull M-AT data into an NPR report. Combining the flexibility of NPR Report Writing with immediate access to M-AT data enhances the reporting power of our MEDITECH 6.x and Expanse clients.

**DefiniTy – Report Tracking & Governance** – Reporting is a critical component for any hospital. Managing the process, or governance, can be exceedingly difficult without a clear workflow associated with development. DefiniTY is an application to help you manage the process. It contains a key module for report management when moving to Expanse where timing is critical.

**LaunchIT** – Clinical workflows can be difficult when applications outside of the EMR need to be utilized. Making the process uninterrupted by automatic login and direct patient launch can save a clinician time and frustration. LaunchIT gives clinicians the ability to optimize their workflow and use their time effectively for a seamless process.

**Vendor Neutral Archive - Paperstore** – Document storage and retrieval. With state-of-the-art imaging, any document such as EOBs, Medical Records, Insurance Cards, etc., can be quickly scanned or imported, secured, and indexed by custom defined fields, making documents available within seconds.

## The HCI Solution, Inc. Products Cont.

**Business Analytics Manager (BAM)** – Key Performance Indicators (KPI) are at your fingertips with our business analytics dashboard. BAM gives you the KPI's across your entire enterprise and not just MEDITECH.

**PC AlertIT** – PC AlertIT is part of HCI's Business Analytics Manager. PC AlertIT actively alerts physicians, and users about incomplete records, unsigned reports, DOWNTIME, and other deficiencies. AlertIT runs as a PC task tray companion to help keep staff up to date.

**Nuntio – Secure Clinical Alerting and Messaging** – A secure messaging & alerting system to significantly reduce physicians time to decision and time to treatment for patients, critical lab, and imaging results and much more. Reduce the number of interruptions to patient care. HIPAA compliant. The tracker boards and alerting features are saving people's lives.
